

Streamline Warehouse Management Processes using cWarehouse

Business Case

Most processes in the warehouse are not being tracked, making the measurement of efficiency difficult. Paper based delivery systems are time consuming and requires constant maintenance. This results in increased turnaround time and higher overheads.

Challenges/Pain areas

- Manually managing the inventory and delivery sequence is tedious.
- The status of jobs and the inventory is updated in the central system only after the actual work is completed, resulting into delayed invoicing, stock mismatch, and lack of transparency.
- No tracking of field workforce and their work in real-time.
- Lack of device integration for OCR, printing, and inefficient browser-based scanning.

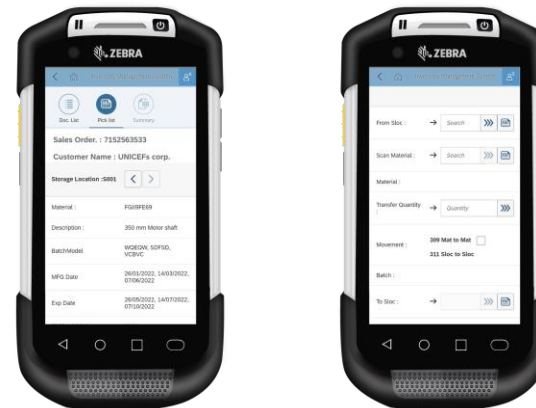

Solution Features/Pain Relief

- Application is fully integrated with SAP BTP, ESS, and SAP B1 with label printing capability.
- cWarehouse offers complete solution for all Inbound, Outbound, and Internal Warehouse operations like suggesting the correct bin location based on business rules, Inbound GR, Outbound Picking, Bin to Bin transfer, Automatic Transfer Order Confirmation, and more.
- Optimize Inventory processes using cWarehouse app: Goods receipt and reversal, Goods Issue, Storage location transfer posting, Plant transfer posting, Stock check, Physical inventory, Goods issue to scrap, and more.
- Moves time consuming manual processes into a convenient app for your mobile devices, reducing system dependency.
- Significantly decreased paperwork.

User/Persona: Warehouse Clerk, Warehouse Manager, Warehouse Staff/Operator

Value Drivers of c-EWM

- Improves warehouse operator efficiency by 30% with 5 times faster deployment.
- 60% operations are via mobile app which reduces manual operation and system dependency.
- 35% reduction in Warehouse Operating costs with paperless process
- 15% labor cost reduced per unit handled.
- Decrease overhead through Lean processes
- In app OCR, barcode scanner and signature capture capabilities.
- Multi-lingual capabilities.
- Application is fully integrated with ECC, S/4 HANA, SAP cloud platform
- Enhanced user interface with better look and feel than standard GUI screens.
- 95% standard BAPIs/API used via O-data services.
- Fully responsive with iOS, and Android support.

Industry/LoB

- All industries using SAP Materials Management (MM) and Warehouse Management (WM) Or Extended Warehouse management (EWM)

GTM Focus

- Americas
- APJ and GC
- EMEA
- MEE

Solution Environment

- SAP BTP
- SAP S/4HANA
- SAP ECC 6.0 and Above
- SAP EWM Embedded/De-Centralized
